

RepTime Hardware Specs

Specifications to run RepTime on Tablets

Handheld Scanners for Road and Showrooms

Users are able to operate RepTime on any Android device to scan barcodes and generate orders. The handheld application holds your customers and items from your main office and is used strictly as an order writing system for the showroom or the road. You can then upload your orders to your desktop or laptop once you have Wi-Fi.

Device: Any Android Based Touch Pad

RepTime does not operate on an Apple iPad. Users are able to use the tested android devices listed below to run RepTime. The application is available for FREE on the Google Play Store under "RepTime Order Writing App"

Android v4.4.2 KitKat or higher devices are required...

- **Samsung Galaxy Tab A or S2:** the A series is the cheaper line and is the generally recommend tablet. However, if your company has over 10,000 customers or over 150,000 catalog records in your RepTime database, we recommend the S2 series, as it has faster hardware, which will assist in handling the extra work load. These tablets operate well on the road and in the showroom. They do not include a barcode reader. You must purchase a separate Bluetooth reader. The cost of the tablet ranges \$130 to \$400. [Website\(A\)](#) | [Website\(S2\)](#)
- **Symbol TC70 by Zebra Technologies** is a robust high-end commercial android scanning device that allows you to use a built-in barcode scanner engine. It operates well in showrooms due to the ease and size of the unit. The cost of the TC70 ranges \$1300 to \$2000. [Website](#)

Bluetooth Barcode Reader...

- **Symbol CS3070 Series & Opticon OPN-2000 Series** are Bluetooth scanners that many use to scan their barcodes printed from RepTime. These devices are needed to scan with all Android tablets except for the Symbol TC70 as it has its own built in reader. The cost of Symbol CS3000 ranges from \$175 to \$250. [Website](#) The cost of OPN-2006 ranges from \$200 to \$300. [Website](#)
- **Other Bluetooth Barcode Readers** that will work with Android Tablets are able to be used with the RepTime app. You are welcome to purchase any Bluetooth barcode reader, at your own risk. We will assist in supporting the unit to an extent cannot guarantee its compatibility.
